

One of Shorts customers is Willmott Dixon; a national contractor that delivers multi-million pound public and commercial projects.

Willmott Dixon is currently building a £23million leisure centre in Fleet.

The building will comprise of a 25m eight-lane pool, sports hall, climbing wall, studio facilities, gym, steam and sauna facilities along with a café and all this will be complete in spring 2017.

We are proud to be working with Willmott Dixon, providing the complete ‘waste removal’ solution to their site in Fleet, as James Higgins, our Waste Sales Representative explains.

“We’ve worked with Willmott Dixon for many years, providing them with skips and waste collections to suit the needs of their project.

“We provide Willmott Dixon with skips from 6yards skips up to 20yards skips. As part of commitment to the environment, Willmott Dixon segregates their waste into three different waste streams – aggregates, plasterboard, and green waste. We also provide commercial wheelie bins for their on-site domestic waste.”

James Higgins, Our Waste Sales representative discussing the sites requirements with Richard Weaving, Willmott Dixon's Senior Build Manager.

Richard Weaving, Willmott Dixon's Senior Build Manager said "Edenbrook Leisure Centre was the first project I have used Shorts on, but they have working alongside Willmott Dixon for a number of years.

"I would highly recommend them as a waste removal company for a number of reasons; from the quick delivery once it is booked in, to issuing me monthly reports which shows what has happened with our waste. Seeing the report is very important to ensure I am complying with my companies waste from landfill targets."
